

Please make the lobbyists go away. I'm tired of them controlling what I watch, listen to, eat, drink, and smoke. I love the versatility of satellite radio and the commercial free environment it provides. It should be the consumer's choice, not NAB's as to what he or she listens to. If some consumers find their product inferior to XM's, then let them respond to the market place and change their product. Leave the rest of us out of it-we want our satellite radio.

Lynne Ramsey
